Kirchheim, XYZ

Secure email communication from now on

Dear **XYZ**,

In order to communicate sensitive information more securely in the future, we have decided to adopt a new email encryption solution. Because of its user comfort and usability we have chosen REDDCRYPT for our purposes.

The usage and integration is very user-friendly and does not require any technical expertise. The solution is developed in Germany and meets highest data protection requirements. Its end-to-end encryption ensures that nobody except sender and recipient is able to read emails. More information as well as technical details can be found at <https://reddcrypt.com>.

If you approve of this form of future email communication between us, we would like to ask you to **register a free account with your email address at <https://app.reddcrypt.com>**.

Please let us know afterwards by sending an email - preferably encrypted - to **XYZ**.

Best regards,
